

INTERCLUSTER WORKSHOP

At October 25, 2018, the IBN Cluster 'Innovatieve Coatings' organized, in collaboration with the IBN Cluster 'Offshore Energy', a workshop and matchmaking event on '**Coating Solutions for Corrosion Protection**' on the university campus of Diepenbeek. This event was attended by 33 people of the industry.

During the workshop, a presentation on the IBN Cluster 'Offshore Energy' was followed by a lecture by Sirris on the 'Opportunities for anti-corrosion solutions in the Offshore Renewable Energy sector, and an explanation by the VUB on 'self-healing coatings'.

Presentations:

- Sirris – [Coating challenges in Offshore Energy Systems](#) by Ozlem Ceyhan Yilmaz, Sirris / OWI Lab / IBN Offshore Energy

- Sirris – [The NeSSIE Project – Opportunities for anti-corrosion solutions in the Offshore Renewable Energy sector](#) by Jeroen Tacq

- VUB – [Self-healing coatings for multiple action corrosion protection: various approaches and analyses](#) by Prof. Iris De Graeve

After the presentations, each participant had the opportunity to present its company/organization to the audience in a 2 minutes pitch.

After a lunch, there was the launch of the **workgroup 'Corrosion'** by Sirris
