Innovatieve Coatings

## Samen voor sterk innoveren

### Workgroup 'Easy To Clean'

Date: March 12<sup>th</sup>, 2019

Venue: Wetenschapspark 3 (Sirris) , 3590 Diepenbeek

We kindly invite you to the workgroup Easy To Clean

### Programme

13:30 Registration

13:50 Welcome and introduction 'Easy To Clean'

14:00 Identification of common interesting topics, possible difficulties and problems, project ideas and potential common projects. Topics to be discussed include:

- **Easy to clean and related surface functions**
  - Anti-dirt
  - Anti-graffiti
  - Anti-fingerprint
  - Anti-ice
  - Non-stick
  - Anti-fouling
  - Self-cleaning
  - Anti-bacterial and hygienic
- **Which substrate materials are to be considered?**

The cluster is sponsored by:

Plasma  
Technology  
Solutions

*TOGETHER FOR STRONG, AMBITIOUS INNOVATING*

- Glass
  - Metal
  - Wood
  - Concrete
  - Stone/tiles
  - Plastics
  - Composite
  - Paint
- **Is there a need for dedicated test methods**
  - **Coating Application process**  
Can easy-to-clean coatings be applied using standard coating processes or is special equipment needed?
  - **European collaboration**
    - What benefits can be gained from collaboration with other European partners by exchanging experiences or to expand our market?
    - What test platforms/facilities outside Belgium would be of interest to have access to?
  - **Training**  
Is there a need for courses with respect to coating technology, application and inspection in the field of easy-to-clean coatings?  
Which need for training is currently not being covered?

15:30 Visit to the Sirris coating lab & Network drink

The goal of the workgroup is to define the themes for common projects which will start in 2019/2020. By joining the workgroup you will get the chance to collaborate with other companies on projects of mutual interest, thereby increasing the projects' success rate, efficiency and value.

Being a member of the cluster 'Innovative Coatings' is a condition for participation.
