

Microwave Energy Applications Management

ALL you wanted to know about MicroWaves...

A one day comprehensive basic training

**Thursday, September 13th, or Thursday, October 11th, 2018
Herk-de-Stad / Belgium**

For people interested to learn more around MicroWave Technology
Beside some theoretical aspects, participants will explore all type of applications by practical experiments. Training will be given by MicroWave – experts.

Program;

- 8h45 Welcome / coffee
- 9h15 Introduction
 - Microwave technology in general
 - Use of MicroWave energy transfer in industry
 - Different components in a MicroWave system
 - Features, benefits, advantages, disadvantages of the technology
 - Microwave safety, regulations and urban legends,
 - General applications & demonstrations
- 11h00 Break
- 11h15 Experimental session 1 – MEAM Explorer
 - Discussion results and application
- 12h30 Lunch Break
- 13h15 Experimental session 2 - MEAM DRY S4
 - Discussion results and applications
- 14h30 Theoretical session. Future perspectives for MicroWave technology
 - Energy-market trends,
- 16h00 Closing and conclusions

Well documented hand-outs are included

Cost 550,-€/day, lunch included
training voucher/certificate possible
